Golden raisins

- shiny golden color, round shape, and its taste is very sweet and delicious
- This raisin is produced by drying high-quality seedless grapes from the city of Malayer in Iran
- Malayer golden raisins are used in various food industries such as bakery, confectionery and producing delicious snacks

Kashmar green raisins

- it has long and elongated appearance and a softer texture than other raisins
- its color is usually between dark green and light green
- this raisin is produced from Askari grapes without seed
- This type of raisin is mainly used in nuts

Kashmar golden raisins

- it has an elongated appearance and its color is golden
- The type of grapes used to prepare this raisin is Askari Pikani without seed, which is very tasty

Sultana

- Sultana raisins are produced from seedless grapes (Thompson grapes are usually used to produce this raisin) in the city of Malayer
- This type of raisins are smaller, sweeter and juicier than other types of raisins and are used in different ways and in different food industries

Maviz

- it is darker in color and larger in size and fleshier than other types of raisins
- The grapes that are used to produce maviz is the seeded shahani grapes(it has few seeds), which varies from very dark red to black in color and is also large in size
